

SPECIALTY DRUG LIST

Starting July 1, 2021

Specialty medications are used to treat complex medical conditions like multiple sclerosis, hepatitis C and rheumatoid arthritis. They're typically injected or infused, and may need special handling (like refrigeration).

About this drug list.

This is a list of the most commonly prescribed oral and injectable specialty medications covered as of July 1, 2021.^{1,2} Medications are listed alphabetically. Brand-name medications are capitalized and generic medications are lowercase. **The drug list is updated often so it isn't a complete list of the medications your plan covers.** Also, your specific plan may not cover all of these medications.

Some plans have specific coverage requirements for specialty medications.

For example, plans may:

- ▶ Limit coverage to a 30-day supply.
- ▶ Cover certain medications under the pharmacy benefit, medical benefit, or under both benefits. These medications have an asterisk (*) next to them. Why does the type of benefit matter? Because it can affect how much the medication costs, you may need approval from Cigna before your plan will cover the medication, and/or you may have to use a specific pharmacy to get coverage. For example, if your medication is covered under the pharmacy benefit, you may have to use Accredo, a Cigna specialty pharmacy, to get coverage.³ If it's covered under the medical benefit, you may be able to get it from your health care provider.

Log in to the **myCigna**® App or **myCigna.com**, or check your plan materials, to learn more about the specialty medications your plan covers.

Together, all the way.®

Offered by: Cigna Health and Life Insurance Company or Connecticut General Life Insurance Company.

Accredo delivers specialty medications and personalized support.

When it comes to specialty medications, you need a pharmacy that's focused on complex medical conditions. Consider using Accredo, a Cigna specialty pharmacy. Their team of specialty trained pharmacists and nurses will fill and ship your specialty medication to your home (or location of your choice).⁴ They'll also provide you with the personalized care and support you need to manage your therapy - at no extra cost. Here are some of the services they provide.

- Easily manage and track your medications on your phone or online
- 24/7 access to specialty-trained pharmacists and nurses
- Fast shipping, at no extra cost
- Easy refills and free reminders
- Personalized care services like training on how to administer your medication
- Help with applying for third-party copay assistance programs and other options

To learn more about Accredo, go to [Cigna.com/specialty](https://www.cigna.com/specialty). Be sure to check out the video to hear more about the personalized care and support Accredo provides. To get started using Accredo, call **877.826.7657**, M-F, 7:00 am-10:00 pm CST and Sat, 7:00 am-4:00 pm CST.

1. State laws in **Texas** and **Louisiana** may require your plan to cover your medication at your current benefit level until your plan renews. This means that if your medication is taken off the drug list, is moved to a higher cost-share tier or needs approval from Cigna before your plan will cover it, these changes may not begin until your plan's renewal date. To find out if these state laws apply to your plan, please call Customer Service using the number on your Cigna ID card.
2. State law in **Illinois** may require your plan to cover your medications at your current benefit level until your plan renews. This means that if you currently have approval through a review process for your plan to cover your medication, the drug list change(s) listed here may not affect you until your plan renewal date. If you don't currently have approval through a coverage review process, you may continue to receive coverage at your current benefit level if your doctor requests it. To find out if this state law applies to your plan, please call Customer Service using the number on your Cigna ID card.
3. Not all plans offer Accredo as a covered pharmacy option. Please log in to the myCigna App or myCigna.com, or check your plan materials, to learn more about the pharmacies in your plan's network.
4. As allowable by law. For medications administered by a health care provider, Accredo will ship the medication directly to your doctor's office.

Cigna reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copay, coinsurance or deductible requirements. Certain features described in this document may not be applicable to your specific health plan, and plan features may vary by location and plan type. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.
