# SPECIALTY PHARMACY

## drug list

Specialty medications are used to treat complex conditions like multiple sclerosis, hepatitis C and rheumatoid arthritis. Although some are oral medications, the majority of specialty drugs are injected and may require special handling (e.g. refrigeration). As part of your pharmacy benefits plan, you have access to Cigna Specialty Pharmacy Services to deliver these medications.

### How it works

When your doctor prescribes a specialty medication, they'll call in or fax the prescription to:

Cigna Specialty Pharmacy Services:  
800.351.3606 (phone)  
800.351.3616 (fax)

Cigna Specialty Pharmacy Services creates a personalized experience that educates and motivates each customer to become active, accountable and confident. We offer the tools to connect and engage you along your health care journey. Our services include 24-hour access to nurses and pharmacists, education about your prescription medications and refill reminders.

Once your prescription order is received and processed, we'll call you to schedule a date and time for delivery. Orders will be delivered to any address you choose for delivery (e.g., home, office, doctor's office).

For all proactive refills or any orders over \$4,000, delivery arrangements need to be made and confirmed with

our pharmacy before we can send them to you. If the pharmacy is not able to reach you, they'll leave a message for you to call them back. The pharmacy can't deliver the medications without your approval, so delivery will be delayed until you reply.

If you need to fill your prescription right away, you may be able to fill your prescription at a local network retail pharmacy. However, you'll only get up to a 30-day supply and must fill the rest of your prescription through Cigna Specialty Pharmacy Services. If your plan offers out-of-network coverage, you can get your prescription at an out-of-network pharmacy, but your out-of-pocket cost will likely be much higher.

**Please note:** Some medications listed here may need to be obtained through your doctor's office or other medical facility. In these cases, your medications will be covered under your medical benefit instead of your pharmacy benefit. This will affect the amount you pay out-of-pocket. Check your plan documents for more information.

**GO YOU**<sup>®</sup>

Offered by: Connecticut General Life Insurance Company or Cigna Health and Life Insurance Company.
